**INTERMEDIX CORPORATION ACQUIRES
BILLING SERVICES DIVISION OF ESO SOLUTIONS, INC.**

Fort Lauderdale, FL - Intermedix Corporation, the leading provider of technology-based business services to emergency providers, announced today that it has acquired the assets and operations of the Billing Services Division (“the Acquired Billing Operations”) of ESO Solutions, Inc. (“ESO”) of Austin, Texas.

The Acquired Billing Operations deliver EMS billing services to EMS providers in Texas, Arizona, California, Missouri, New Mexico, South Carolina, Washington and Wisconsin. Intermedix will take over the Acquired Billing Operations and ESO will continue to provide its medic-friendly, innovative electronic patient care reporting (ePCR) software solutions to clients of the Acquired Billing Operations and other EMS and Fire organizations that do not currently utilize the Acquired Billing Operations for outsourced billing services.

Doug Shamon, CEO of Intermedix, commented, “This acquisition enables us to further solidify our market leadership in important geographies and to strengthen our management team. We are fortunate to have Bob Riley and his team coming aboard and are committed to continuing to provide great client service along with the advantages of the Intermedix billing platform. It also enables us to further strengthen our capabilities in non-emergency ground medical transportation billing, which accounts for 35% of ESO’s billing business. We are pleased to welcome the people and clients of the ESO Billing Services Division to Intermedix.”

Chris Dillie, CEO of ESO, added, “We are confident that our customers will greatly benefit from this decision. The acquisition of our Billing Services Division by Intermedix will allow ESO to focus solely on continuing to provide industry leading EMS and Fire software solutions to the market. We recently released our most significant ePCR upgrade to date – ESO Pro™ Version 4.0 – and look forward to working with Intermedix and other billing partners to provide this solution as well as other EMS and Fire software solutions to a larger client base.”

About Intermedix Corporation

Intermedix (www.intermedix.com) helps fund and support our nation's emergency safety net - emergency physicians, hospital emergency departments, and 911-emergency responders. We engineer advanced technologies into our business processes to meet incident documentation requirements, realize revenue potential, and provide advanced informatics to our customers. Our solutions are designed for performance and compliance, allowing our customers to focus on saving lives and promoting healthy recoveries from accidents and illnesses.

Intermedix serves the emergency physician and hospital emergency department market through its subsidiary EPBS-Intermedix, the emergency medical services (ambulance) market through its subsidiary ADPI-Intermedix, and the fire response market through its subsidiary Revenue Rescue-Intermedix. The Company also provides a state of the art, hosted electronic patient care reporting solution under the brand names TripTix®Mobile and TripTix® Web. Intermedix has clients throughout the United States and has collected billions of dollars for its clients since its founding.
